1 Software requirements

Students are required to bring their own laptop with R version 4.1 or greater.

Please make sure that your computer's hardware is sufficiently powered (>4 GB RAM, > 2 GB free disk space), that you have a working wireless card, and that you have administrator rights.

1.0.1 Local installation

1. Install R 4.1 R/CRAN
2. (Optional but recommended) Install RStudio Desktop
3. Install the *renv* package by entering the following command in an R session:

```
install.packages("renv")
```

4. (Optional but recommended) Create a new *R project* for this course
5. In an R session within the R project you just created, install the *renv* environment for this course by running

```
url <- "https://raw.githubusercontent.com/statOmics/HDDA21/master/renv.lock"
renv::restore(lockfile = url)

## Optionally, record the status of your local renv library
renv::snapshot()
```
