Software requirements

Contents

Students are required to bring their own laptop with R version 4.1 or greater.

Please make sure that your computer's hardware is sufficiently powered (>4 GB RAM, > 2 GB free disk space), that you have a working wireless card, and that you have administrator rights.

0.0.1 Local installation

1. Install R 4.1 R/CRAN

2. (Optional but recommended) Install RStudio Desktop

3. Install the *renv* package by entering the following command in an R session:

   ```r
   install.packages("renv")
   ```

4. (Optional but recommended) Create a new *R project* for this course

5. In an R session within the R project you just created, install the *renv* environment for this course by running

   ```r
   url <- "https://raw.githubusercontent.com/statOmics/HDDA21/master/renv.lock"
   renv::restore(lockfile = url)

   ## Optionally, record the status of your local renv library
   renv::snapshot()
   ```
